

## European Network for Health Technology Assessment - EUnetHTA

**January 31, 2006**

### **Paragraph to be included in the newsletters/website news sections:**

European Network for HTA - EUnetHTA starts its work in January 2006.

HTA agencies, research institutions, and health ministries from 24 European countries have joined their efforts to develop an effective European Network for Health Technology Assessment – EUnetHTA. [Name of the Organisation] is participating in EUnetHTA as an Associated Partner/Collaborating Partner.

*During the first 3 years of existence (2006-2008) EUnetHTA aims at developing an organisational framework for a sustainable European Network for HTA along with practical tools to fill into this framework to ensure timely and effective production, dissemination and transfer of HTA results into useful policy advice to the Member States and EU. The project progress can be monitored at [www.eunetha.net](http://www.eunetha.net) and the final results will be presented at the EUnetHTA Conference in 2008.*

In addition to face-to-face meetings and conventional electronic communication, modern ways of collaboration through e-meeting facilities will be available to the project members and their staff.
