

The **Dagdas lab** at the **Gregor Mendel Institute of Molecular Plant Biology** aims to understand cell autonomous and non-cell autonomous roles of selective autophagy in cellular homeostasis. To support our international research team on a project addressing basic biological questions at the interface of plant developmental biology, molecular biology, and genetics, we are looking for a :

## TECHNICIAN

Main responsibilities will include:

- Transforming, selecting, and crossing *Arabidopsis thaliana*
- Molecular cloning / PCR
- Genotyping
- Lab organization (ordering, lab & data management)

Requirements:

- Experience in plant biology
- Undergraduate or Masters degree in life sciences
- Good command of written and spoken English
- Good organizational and documentation skills
- High motivation
- Willingness to learn new techniques

The GMI is part of the **Vienna BioCenter**, one of Europe's leading life-sciences research locations, with over 1,800 researchers from 70 countries, organized into a broad spectrum of research institutes, universities, and companies.

The campus is located near the center of Vienna, one of the world's most liveable cities. The working language is English, and the environment is family-friendly, with subsidized on-campus child-care facilities.

To apply, please send your CV, a letter of motivation, and contact information for 2 referees to Dr. Yasin Dagdas ([yasin.dagdas@gmi.oeaw.ac.at](mailto:yasin.dagdas@gmi.oeaw.ac.at)).

The position is initially planned for 3 years, but can be extended based on performance. The expected starting date is April 1<sup>st</sup> 2019.

The planned gross monthly salary is EUR 2.500 with overpayment possible based on qualifications and experience.
