Hiroyuki MATSUDA

- Prof. emer. at the Faculty of Environment and Information Sciences, Yokohama National University, Japan
- Now Researcher at The National Institute of Advanced Industrial Science and Technology
- UNESCO Chair holder "Education in Biosphere Reserves for Sustainable Societies" (EBRoSS)
- Member of the UNESCO's MAB National Committee of Japan
- In 2012, 2013, 2014, 2015: Representative of Japan to International Coordinating Council of UNESCO's Man and the Biosphere (MAB) Programme (MAB-ICC)
- 2009–2022 Past Chair of the Japanese Coordinating Committee for UNESCO's Man and the Biosphere Programme
- Past President of East Asian Federation of Ecological Societies
- Past President of Ecological Society of Japan
- Pew Marine Fellow (since 2007)

There is a growing consensus that we should not only protect pristine natural environments, but also conserve the nature that encompasses human communities. The importance of nature within urban areas is also growing. In an era of declining human populations, the human-wildlife conflict is becoming increasingly severe, and a "new deal for nature and people" is needed. I will discuss the "living in harmony with nature" through practical examples from the Convention on Biological Diversity, wildlife management, education for sustainable development (ESD), and citizen science.

PROGRAMME

OPENING AND GREETINGS

Margreth Keiler | Director, Institute for Interdisciplinary Mountain Research, ÖAW

Heinrich Mayer | Biosphere Reserve Nockberge

Michael Bahn | Department of Ecology, University of Innsbruck

INTRODUCTION AND MODERATION

Günter Köck | Institute for Interdisciplinary Mountain Research, ÖAW & World Network of Mountain Biosphere Reserve Advisory Group

LECTURE

Hiroyuki Matsuda

A new and traditional relationship between Humanity and Nature

Q&A

Günter Köck

CLOSING WORDS
