Participatory technology assessment (pTA)

Describes a “... class of methods of assessing socio-technological issues that actively involve various kinds of social actors as assessors and discussants.”

(Joss and Bellucci, 2002: 7)

- Citizens (lay persons)
- Civil society organisations
- Stakeholders
- Representatives of the state system

Expectations: pTA promises to ...

- ... improve legitimacy of socio-technical decisions
- ... acknowledge that knowledge is distributed
- ... include diverse values, preferences, interests and worldviews
- ... raise acceptability of technology
- ... foster public understanding and engagement
- provide potential answers to:
“crisis of democracy” and “crisis of expertise”

Critique of ideals and practice of pTA

- Vague aims (in practice)
 - Instrumentalisation by policy-makers
 - Unclear link to political decisions
 - Deliberative bias
 - Ignorance of expertise
 - High costs/low effect
- Challenges for pTA:
quality control; conscious design;
strong link to politics

pTA at ITA

- Many years of experience with stakeholder participation, e.g. 'Delphi Austria' project (1998)
- pTA from a theoretical perspective
 - Research on pTA (EUROpTA, 2002)
 - Assessment of pTA (Bogner, 2004)
 - pTA and technology policy (Techpol 2.0 2006, pTA Ageing 2008)
- Research on e-participation, e.g. DEMO-net, e2dem (2006ff)
- Doing pTA projects involving also lay people (2006ff)

ITA's pTA projects from 2007

Themes:

privacy and security

energy and households

ageing society

climate policy

future research topics

nano politics

sustainable consumption

Years:

2007, 2013

2007

2011

2013

2009

2009/2010

2011

2013

ITA's pTA projects from 2007

Themes:

privacy and security
energy and households

ageing society
climate policy

future research topics
nano politics
sustainable consumption

Projects:

PRISE, (SURPRISE)
FSA Energy
Smart New World?
PACITA
WWViews

CIVISTI
NanoSafety
PACITA

ITA's pTA projects from 2007

Themes:

privacy and security
energy and households

ageing society
climate policy

future research topics
nano politics
sustainable consumption

European Commission
Austrian Government
Austrian Research Agency

European Commission
Austrian Government &
world politics

European Commission
European Parliament
European Commission

ITA's pTA projects from 2007

Themes:

privacy and security
energy and households

ageing society
climate policy

future research topics
nano politics
sustainable consumption

Methods:

focus groups
future search,
focus groups
scenario workshop
citizens consultation

citizens consultation
focus groups
citizens consultation

Strategic Development Plan of the Austrian Academy of Sciences

- Main focus: Basic research, but “open for application”
 - New parallel aim:
Societal relevance of research
 - answering “complex questions of scientific and societal relevance”
 - giving science-based advice for politics and society
- pTA toolbox and experience as a valuable contribution to this overall aim of the Academy
