

COLOURS REVEALED

POLYCHROME MONUMENTS IN THE ROMAN PROVINCES – DETECTION, INTERPRETATION, VISUALISATION

The conference will focus on the polychrome appearance of stone monuments in the Roman provinces. Although numerous examples with well-preserved colour settings from different regions of the Roman Empire have survived, research into them is still in its infancy. In contrast to the sculptural and architectural heritage of the Mediterranean region, no comprehensive studies on the use, the extent, and the materiality of coloured surfaces on stone are yet available for the peripheral areas of the empire.

No conference fees will be charged, but please register by 8 March 2024 at the latest under gabrielle.kremer@oeaw.ac.at if you want to participate in person or online!
For the preliminary programme please scan the QR-Code!
