ESF Exploratory Workshop on

The Sea Peoples Up-To-Date. New Research on the Migration of Peoples in the 12th Century BCE

Vienna (Austria), 03–04 November 2014

Convened by:
Peter M. Fischer

Co-sponsored by

 **IOEA** Institute for Oriental
and European
Archaeology

The European Science Foundation (ESF) was established in 1974 to provide a common platform for its Member Organisations to advance European research collaboration and explore new directions for research. Currently it is an independent organisation, owned by 67 Member Organisations, which are research funding organisations, research performing organisations and academies from 29 countries.

ESF is in a period of transition; the ESF Member Organisations (MO's) have indicated that they would like to wind down certain ESF activities, such as EUROCORES, RNP's, ECRP's and Forward Looks by the end of 2015, but ESF will continue to honour its existing commitments until the projects are finalised.

In 2013 the only research instrument that will have a call for proposals is the Exploratory Workshops. The focus of the Exploratory Workshops scheme is on workshops aiming to explore an emerging and/or innovative field of research or research infrastructure, also of interdisciplinary character. Workshops are expected to open up new directions in research or new domains. It is expected that a workshop shall conclude with plans for follow-up research activities and/or collaborative actions or other specific outputs at international level.

ESF is also currently exploring new areas where we could serve the science community. Services we have identified that would leverage our expertise and experience and provide added-value to the science community are: peer review, evaluation, research conferences and career tracking.

Please check our website (www.esf.org) for regular updates regarding ESF and its future developments.

**The Sea Peoples Up-To-Date.
New Research on the Migration of Peoples in the 12th Century BCE**

Vienna (Austria), 03–04 November 2014

Convenor:

Peter Fischer (Austrian Academy of
Sciences / University of Gothenburg)

OREA, Austrian Academy of Sciences,
Dr. Ignaz Seipel-Platz 2
1010 Vienna
Austria

Main Objectives and Agenda of the Workshop:

In the 12th century BCE the s.c. Sea Peoples, starting their migration in south-eastern Europe, transformed the political landscape in the Eastern Mediterranean and affected the high cultures of Mycenae, Hatti, Cyprus, Levant and Egypt. The Hittite empire collapsed, Mycenae and Egypt weakened in the wake of their migration towards the Southern Levant (Palestine). The workshop's benefits are: 1. Highly-specialised ESF-teams and young scientists will discuss most recent research/new hypotheses on the Sea Peoples; 2. Gathering of scientists carrying out research in a political sensitive area (Eastern Mediterranean/Israel/Jordan /Palestine).

Additional objectives:

Planning of future co-research.

Report publication and dissemination

The organiser of the workshop will function as the editor of the workshop proceedings in cooperation with OREA at the Austrian Academy of Sciences. It is planned to publish the workshop volume within maximum one year after the gathering.

Objectives of the ESF Scientific Review Group for the Humanities

The main tasks of the **ESF Scientific Review Group for the Humanities** are:

- to encourage interdisciplinary work through the independent evaluation of collaborative research proposals emanating from the scholarly community;
- to identify priority research areas and to play an integrative and co-ordinating role by creating links between research communities which in the Humanities are often small and fragmented.
- to provide expert advice on science policy actions at the European level in the field of its responsibilities.

The Scientific Review Group is well aware that the ESF is the only European Agency where the Humanities have a place next to the other sciences and where European projects are reviewed, developed and subsequently operated.
