

Job ID: RICAM035PD122

The Johann Radon Institute for Computational and Applied Mathematics ([RICAM](#)) of the Austrian Academy of Sciences ([OeAW](#)), Austria's leading non-university research and science institution in Applied Mathematics, focuses on basic research in applied mathematics, and within the Institute mathematicians from all around the globe collaborate on common core areas in mathematical modeling, simulation, inverse problems and optimization. RICAM has proven to stand for excellence in research, as can be seen from a high level of publications and the popularity of the Institute's Special Semesters within the academic community. The working groups at RICAM provide a broad field of expertise over a whole range of different subjects, and together they create an exciting atmosphere to carry out research in applied mathematics. The institute is offering a

POSTDOC POSITION (F*M)

(full-time, 40h per week)

in the research group “**Computational Methods for Partial Differential Equations**”. The position is offered for an initial period of one year (with possible extensions up to a maximum of six years), starting on May 1, 2022.

The full-time position is affiliated with the research group “Computational Methods for Partial Differential Equations” (led by Prof. Herbert Egger) at RICAM, located in Linz/Austria.

The successful candidate will work on numerical methods for partial differential equations, in particular, mixed finite element methods for coupled systems arising in acoustics, elastodynamics, electromagnetics and fluid flow. Close cooperation with the groups on optimization and inverse problems as well with the new SFB F90-N in the context of electric machine simulation is expected.

Your profile:

- PhD in applied mathematics.
- Strong background in computational methods for partial differential equations, in particular, mixed finite element methods, numerical analysis and scientific computing.
- English skills needed.

Our offer:

- Excellent opportunities to work in a lively research environment and collaborate with international experts in the fields related to the project.
- An annual gross salary of € 55.242,60 according to the salary scheme of the Austrian Science Fund (FWF).

We invite you to send your application (including a scientific CV, a short research statement, and references for possible recommendation letters) via e-mail to herbert.egger@ricam.oeaw.ac.at, (mentioning Job ID: RICAM035PD122), until **March 30, 2022**. The position will be available starting from May 1, 2022. Late applications will be considered until the position is filled.

The Austrian Academy of Sciences (OeAW) pursues a non-discriminatory employment policy and values equal opportunities, as well as diversity. Individuals from underrepresented groups are particularly encouraged to apply.
