

COVID 19 Safety Measures

6th Biennial Conference on Migration and Integration Research in Austria

Crossing borders - Perspectives in Migration Research

16.9.2020 - 18.9.2020, University of Salzburg

The COVID 19 prevention concept for the 6th Biennial Conference on Migration and Integration Research in Austria is based on recommendations by the Federal Ministry of Social Affairs, Health, Care and Consumer Protection, the province of Tyrol, and the COVID 19 guide for events of the province of Salzburg.

The following measures apply to all participants of the conference:

Prior to the conference:

- ✓ Please indicate which panels you wish to attend within the standard registration form!

Upon arrival:

- ✓ Please wear a mouth-nose-protection mask!
- ✓ You may use disinfectants for your hands – they will be provided at several stations.
- ✓ There will be no welcome table. Instead, all programme-relevant information and name badges will be provided in the auditorium, where the Opening Plenary Session is held.
- ✓ There will be signs in the Uni Park informing all participants about the rules of distance and the obligation to wear masks. In case you lose your mouth and nose protection mask, additional masks can be provided by the organizers.

During the panel sessions:

- ✓ Please wear a mouth-nose-protection mask, except during the time of your own presentation(s)! The mask can also be removed briefly to ask a question during the discussion.
- ✓ Keep 1.5 to 2 meters distance between participants, we will have staggered rows of seats in the seminar rooms.
- ✓ Presenters of each panel will sit at 1.5 to 2 metres apart.

During coffee breaks:

- ✓ Please note that there will only be coffee breaks in the Uni Park gallery. The reception drinks and a joint conference dinner will be completely waived for security reasons. The lunch break on Thursday shall be self-organized outside of the conference venue.
- ✓ Please try to avoid crowding around coffee tables! Return your dishes to one of several decentralized stations!

If you have COVID 19 symptoms during the conference:

- In case of emergency, call **144** to inform the rescue service immediately!
- If no emergency medical care is required, persons with COVID 19 symptoms must clarify whether they can return home without public transport (for example with the help of a person living in the same household with a private car). The person should call the hotline **1450** so that a COVID 19 screening can be initiated.
- Persons who develop COVID 19 symptoms (fever, cough, etc.) at the time of the conference will move to a separate ventilated room/tent, reserved for this purpose by the university and must wear a mouth-nose-protection mask and disinfect their hands.

The organisers recommend all participants to download the Austrian Stopp Corona App <https://www.stopp-corona.at/>.

If you have further questions, you can contact the COVID 19 representative of the conference, Dženeta Karabegović, dzeneta.karabegovic@sbg.ac.at, +43 6602159653.

We hope that you enjoy a pleasant and safe conference!
