

Poverty perspectives and measurement approaches

Wittgenstein Centre Conference 2019

“Demographic Aspects of Human Wellbeing”

Anna Dimitrova, Erich Striessnig, Dilek Yildiz

November 2019

Years of Good Life (YoGL)

Capable Longevity

- ✓ Being out of poverty
- ✓ Being free from physical limitations
- ✓ Being cognitively able

Subjective Quality of Life

- ✓ Being satisfied with life

Defining poverty: main concepts

Absolute VS relative poverty

- Absolute: deprivation of basic human needs.
- Relative: unequal distribution of resources within a society.

Poverty as deprivation of “capabilities”

- Poverty is absolute in the space of capabilities but relative in that of commodities and resources (Amartya Sen).

Objective VS subjective poverty

- Objective: externally observed and universally applied.
- Subjective: *feeling* of deprivation.

Chronic VS transient poverty

How we measure poverty can importantly influence how we come to understand it, how we analyze it, and how we create policies to influence it.

Alkire and Foster 2011

Monetary measures

Data requirements

1. Collection of household survey data (consumption- or income-based)

2. Adjustments for price level differences between countries and inflation

3. Equivalence scale application

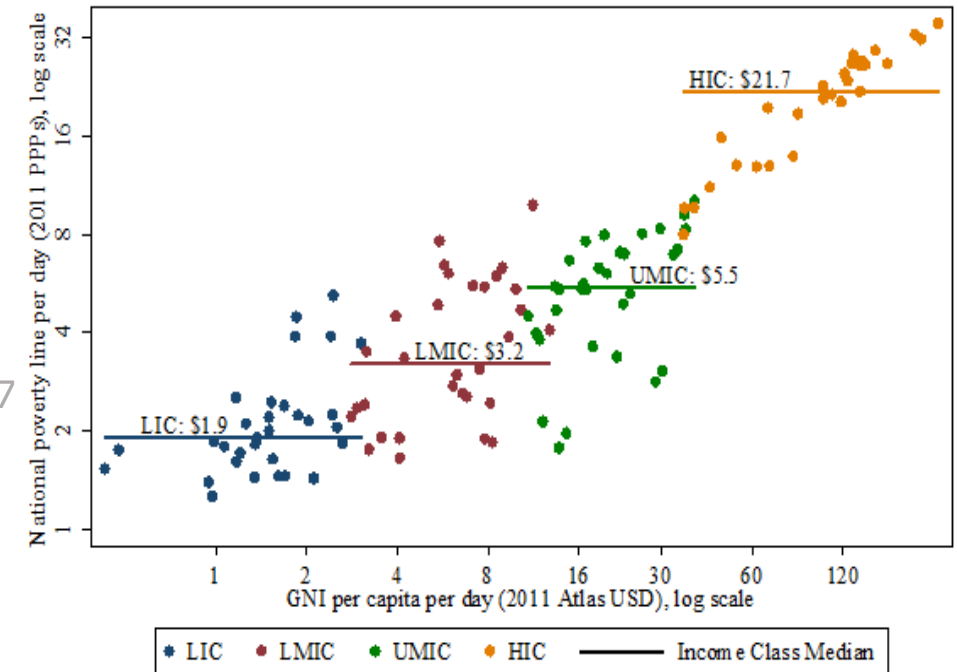

Equivalized household income in international purchasing power dollars (at 2011 prices)

Monetary measures

Poverty assessment

- World Bank's International Poverty Line (IPL)
- Needs-based poverty lines
 - Food-energy-intake (Ravallion 2010)
 - Cost-of-basic-needs (Rowntree 1901; Orshanski 1965; Allen 2017)
- Consensual budget standards (Bradshaw et al. 2008)

World Banks IPL: \$1.90/day

Monetary measures

Data aggregation

- Poverty headcount ratio
- Poverty gap index
- Squared poverty gap index

Foster-Greek-Thorbecke (FGT) class of measures for inequality of poverty:

$$P_{\alpha} = \frac{1}{n} \sum_{i=1}^q \left(\frac{z - y_i}{z} \right)^{\alpha}$$

z – poverty line

y_i – level of income or other poverty indicator for individual i

n – size of the total population

q – number of poor people

α – “poverty aversion” parameter

Human poverty is more than income poverty – it is the denial of choices and opportunities.

Human Development Report 1997, UNDP

Multidimensional measures

Data requirements

Multidimensional measures

Poverty assessment

- The Multi-dimensional Poverty Index (MPI)
- EU's Material and Social Deprivation Indicator

The Global MPI

Source: OPHI

Multidimensional measures

Poverty assessment

- The Multi-dimensional Poverty Index (MPI)
- EU's Material and Social Deprivation Indicator

Could not afford at least 5 items (out of 13):

- ✓ ☐ face unexpected expenses;
- ✗ ☐ one week annual holiday away from home;
- ✗ ☐ avoid arrears (in mortgage, rent, utility bills and/or hire purchase instalments);
- ✗ ☐ afford a meal with meat, chicken or fish or vegetarian equivalent every second day;
- ✓ ☐ a car/van for personal use;
- ✗ ☐

Multidimensional measures

Data aggregation

- The “counting approach” and the headcount ratio
- Alkire-Foster (AF) “adjusted” headcount ratio (Alkire & Foster 2011)

$$M_0 = H \times A$$

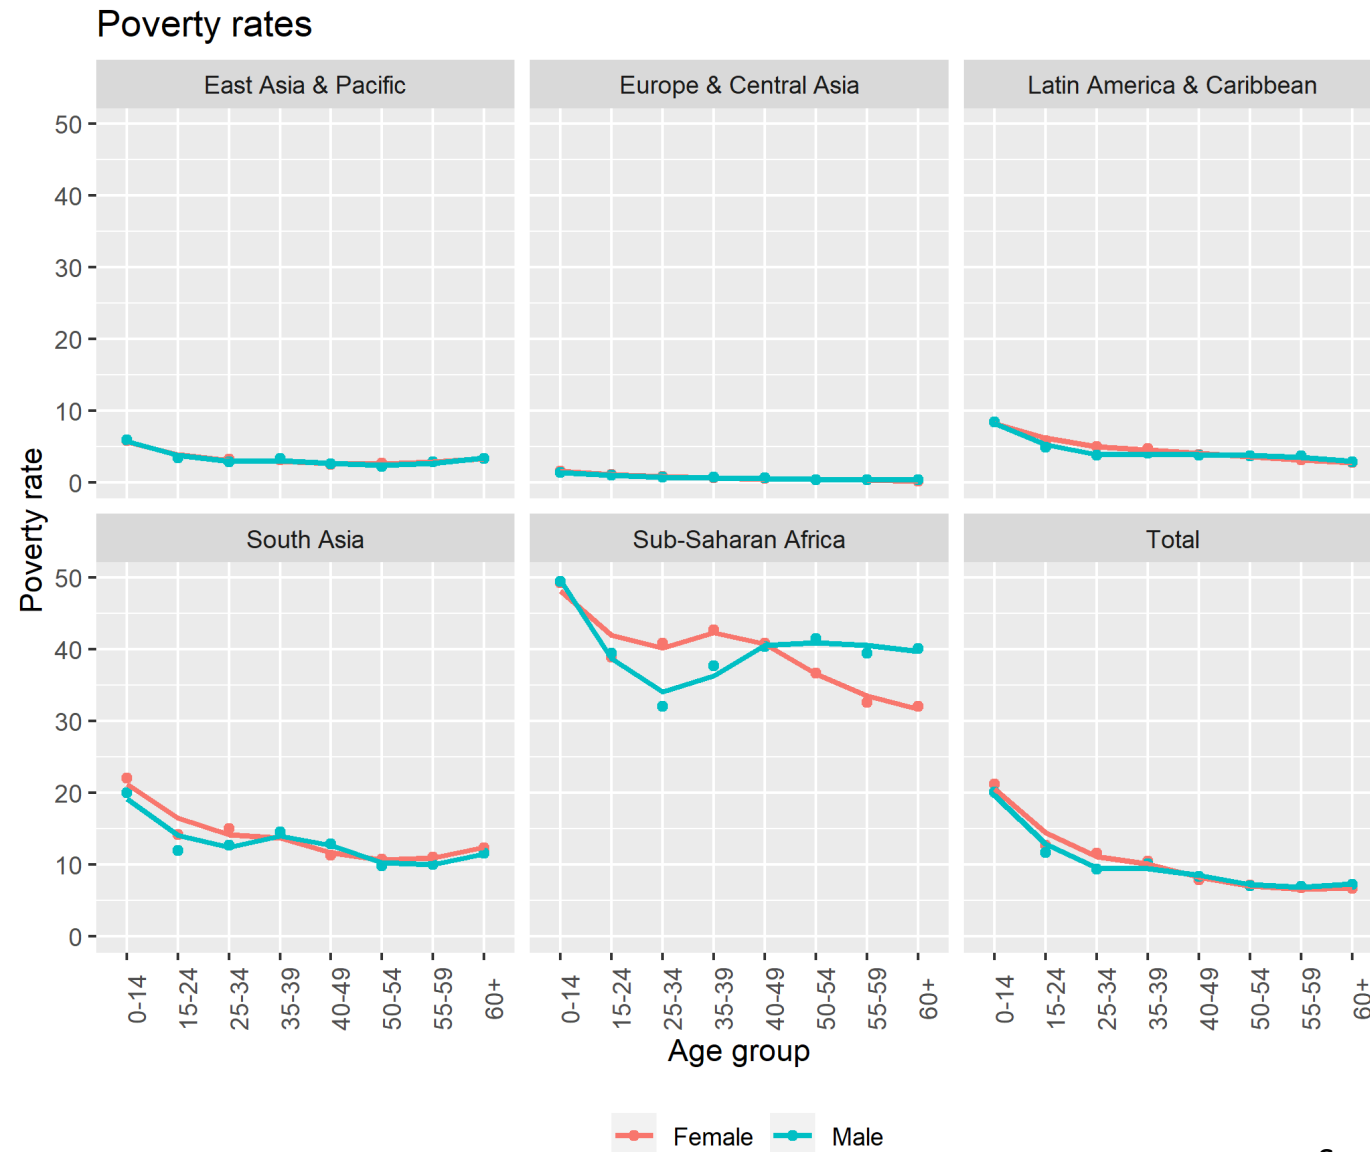

$\left\{ \begin{array}{l} (M_0) \text{ adjusted headcount ratio} \\ (H) \text{ the incidence of poverty} \\ (A) \text{ the intensity of poverty} \end{array} \right.$

Additional considerations

Accounting for inequalities *within* the household (Munoz Boudet et al. 2018)

- The gender poverty gap
- The poverty “cycle”

World Bank poverty headcount at \$1.90/day by age and gender

Source: Based on Munoz Boudet et al. 2018

Dimensions of child deprivation

Deprivation	Mild	Moderate	Severe	Extreme
Food	Bland diet of poor nutritional value	Going hungry on occasion	Malnutrition	Starvation
Safe drinking water	Not having enough water on occasion due to lack of sufficient money	No access to water in dwelling but communal piped water available within 200 meters of dwelling or less than 15 minutes walk away	Long walk to water source (more than 200 meters or longer than 15 minutes). Unsafe drinking water (e.g. open water)	No access to water
Sanitation facilities	Having to share facilities with another household	Sanitation facilities outside dwelling	No sanitation facilities in or near dwelling	No access to sanitation facilities
Health	Occasional lack of access to medical care due to insufficient money	Inadequate medical care	No immunisation against diseases. Only limited non-professional medical care available when sick	No medical care
Shelter	Dwelling in poor repair. More than 1 person per room	Few facilities in dwelling, lack of heating, structural problems. More than 3 people per room	No facilities in house, non-permanent structure, no privacy, no flooring, just one or two rooms. More than 5 persons per room	Roofless – no shelter
Education	Inadequate teaching due to lack of resources	Unable to attend secondary but can attend primary education	Child is 7 or older and has received no primary or secondary education	Prevented from learning due to persecution and prejudice
Information	Can't afford newspapers or books	No television but can afford a radio	No access to radio, television or books or newspapers	Prevented from gaining access to information by government, etc.
Basic Social Services	Health and education facilities available but occasionally of low standard	Inadequate health and education facilities near by (e.g. less than 1 hour travel)	Limited health and education facilities a days travel away	No access to health or education facilities
