Malgorzata Mikucka
Do parenthood and partnership protect life satisfaction in the old age?
The author shows that life satisfaction of parents in Switzerland is shaped by the economic costs of parenthood and the work-family conflict.

Ognjen Obućina, Sven Oehrtl & Siddartha Aradhya
Partner choice and mortality in Sweden
The analysis shows that there is an association between mortality risk and intermarriage among men in Sweden, whereas we find no such evidence for women.

Somefun D. Oluwaseyi
The effect of family and neighbourhood social capital on youth mental health in South Africa
Our results confirm the independent effect of neighbourhood characteristics on youth mental health and did not support family social capital as being protective for developing depression.

Bernhard Riederer
Singles in the city: happily ever after?
This study compares subjective wellbeing across household types and shows why "the happy young single" is not better off than "the lonely elderly person".

Jiaxin Shi, José Manuel Aburto, Pekka Martikainen & Alyson van Raalte
Beyond differences in means: rising mortality stratification among income groups in Finland, 1996-2014
The new measurement proposed by the authors yields an upward trend of mortality stratification between income groups in Finland since 1996.

Felix Bittmann
Education at any cost? About the effects of secondary-track mismatch on pupils' wellbeing in Germany
The author demonstrates that pupils in the academic schooling track without a teacher's recommendation display persistently lower abilities and wellbeing than their peers.

Andrea Bonanomi
The impact of change of employment status on quality of life indicators. A longitudinal study on young Italian people by using traditional and social media data
The transitions from and to the Neet condition have a significant impact on wellbeing and quality of life of young Italians.

Agatazka Chleb-Dominikus, Iga Magda & Paweł Strzelecki
Mothers' life-course work and career choices and intergenerational ties at older age
Using SHARE data, the authors analyse women’s economic activity over the life course and intergenerational relations in later life.

Baptiste Fournier, Clémence Kieny & Jürgen Maurer
Deconstructing gender differences in experienced utility among older adults in the developing world: the role of time use and activity-specific affective experiences
Female disadvantage in old-age experienced wellbeing in five developing countries is more attributable to gender differences in activity-specific affects than to time use.

Giang Nghiem
Consumer credit and life satisfaction: the role of financial literacy and financial advice
Using consumer credit makes German households unhappy, but the distress disappears for those who are financially literate and use financial advice simultaneously.

Changes in parental self-rated health around the time of childbirth vary across Europe, Natalie Nitsche & Mikko Myrskylä

...being across different European welfare regimes. This research investigates gender differences in employment status and subjective well-being among migrants and natives. Southern Europeans benefit the most from more contact.

...subjective wellbeing at school, both with schoolmates and teachers. In the Italian context no differences emerge between native and immigrant children in the provision of aged care at home, which negatively affects their health/wellbeing.

The author shows that educational attainment increases life satisfaction of Mexican adolescents compared to natives.

...aggravated by the economic crisis.

The authors say that measures of wellbeing in Italy show a notable gender gap, depressions, and anxiety disorder and depression.

The authors are showing that the effect of low or high numbers of children on different health measures varies by national context.
Monday 11 November, 13:20-14:20

DEMOGRAPHIC DIFFERENTIALS IN LIFE SATISFACTION AND WELLBEING

Kazuma Sato
Understanding obesity and happiness: a comparative study of the United States and China. The author indicates that while obesity has negative effects on individuals in the United States, it has a positive effect on the individuals in China.

Maria Flórez-Salcio and Andrea Tinto
Gender differentials in subjective wellbeing in the European Union. The authors find high levels of poor subjective wellbeing among the Egyptian population, with age- and gender-specific predictors of suffering poor wellbeing.

MIGRATION AND WELLBEING

Luisa Tornato, Alessio Bubani, Esteban Cela & Angela Paparone
Satisfaction and educational attainment: a case of immigrants, permanent vs. temporary?

Andrew E. Clark, Conchita D'Ambrosio & Nicholas Rohde
A higher number of children has a positive effect on life satisfaction, but this effect strongly varies by gender, age and educational level.

SUMMARY

The authors compare momentary and recall life evaluations, showing significant time

Gender, education and income inequality on the Cameroon labour market
Ashish Singh & Laeek Siddiqui
Indices for measuring socioeconomic inequality in longevity: theory and an application to India
The poster shows that India suffers from substantial socioeconomic inequalities in longevity with economically, demographically and socially disadvantaged groups having a relatively lower representation in longevity.

Jonas Vossemer & Anna Baranowska-Rataj
Unemployment and the wellbeing of families: the mediating role of household income and the quality of relationships
Only a small part of the negative effect of unemployment on the wellbeing of the partner is due to poorer relationship quality.

CONFERENCE ORGANISERS:
Wolfgang Lutz
Alexia Fürnkranz-Prskawetz
Raya Muttarak
Sonja Spitzer
