

7th June 2016

Dear Participants,

The Science and Technology Impact Assessment Panel of the European Parliament has initiated a foresight study on *Assistive technologies for the inclusion of people with disabilities in society, education and jobs*.

The aim of the project is to support Members of the European Parliament in anticipating future opportunities and challenges presented by assistive technologies by exploring and assessing their future impacts.

The project will focus upon the impacts of assistive technologies upon the inclusion of disabled people in society, education and jobs. We will consider the opportunities and challenges for all citizens, including those without disabilities, but will focus in particular upon the deaf and hard of hearing, blind and visually impaired and people with autism.

We invite you to participate in the project by responding to the questionnaire.
